Project Design Phase-II Technology Stack (Architecture & Stack)

| Date | 03 October 2022 | |
|---------------|--|--|
| Team ID | PNT2022TMID35651 | |
| Project Name | Project - Smart Lender - Applicant Credibility | |
| | Prediction for Loan Approval | |
| Maximum Marks | 4 Marks | |

Technical Architecture:

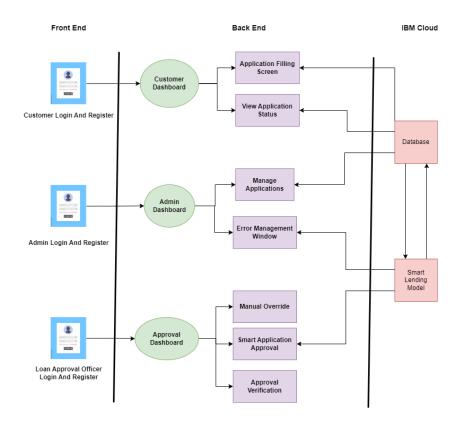

Table-1 : Components & Technologies:

| Component | Description | Technology |
|----------------------------|---|--|
| User Interface | Customer, Admin and Loan Approval Office be able to register login and use the functio available to them. | |
| Application Filing | Available to customers only, this screen allocustomers to fill details in an online application loan approval. | <u> </u> |
| View Application Status | View pertinent information relevant to the applications. Can be accessed by admin or | Javascript nly. |
| Manage Applications | Ability to modify applications as and when r Can be accessed by admin only | |
| Error Management Window | Ability to rectify or troubleshoot errors. Can accessed by admin only. | be Javascript |
| Manual Override | Ability to change loan approval decision ma Available only to loan approval officer. | anually. Javascript |
| Smart Application Approval | Performs automated loan approval decision gives details supporting decision | n and Javascript, Python |
| Application Verification | Verification of application and documents p by applicant | rovided Javascript |
| Cloud Database | Data Types: String, Number, Float, Int, Boo Configuration: abort-slave-event-count allow-suspicious-udfs FALSE archive ON auto-increment-increment 1 auto-increment-offset 1 autocommit TRUE automatic-sp-privileges TRUE avoid-temporal-upgrade FALSE back-log 80 basedir /home/jon/bin/mysql-8.0/ | MySQL Online |
| | User Interface Application Filing View Application Status Manage Applications Error Management Window Manual Override Smart Application Approval Application Verification | User Interface Customer, Admin and Loan Approval Office be able to register login and use the function available to them. Application Filing Available to customers only, this screen allocustomers to fill details in an online application approval. View Application Status View pertinent information relevant to the applications. Can be accessed by admin only Ability to modify applications as and when a can be accessed by admin only Error Management Window Ability to rectify or troubleshoot errors. Can accessed by admin only. Manual Override Ability to change loan approval decision made available only to loan approval decision gives details supporting decision Application Verification Application Verification Verification of application and documents possible by applicant Cloud Database Cloud Database Data Types: String, Number, Float, Int, Boo Configuration: abort-slave-event-count allow-suspicious-udfs archive oN auto-increment-increment 1 auto-increment-offset 1 auto- |

| | | transaction-alloc-block-size transaction-isolation READ | 8192 REPEATABLE- | |
|-----|---------------------------------|--|---|------------------------|
| | | transaction-prealloc-size transaction-read-only transaction-write-set-extraction updatable-views-with-limit validate-user-plugins verbose wait-timeout | 4096 FALSE XXHASH64 YES TRUE TRUE 28800 | |
| 10. | File Storage | Network File System (NFS) | | IBM Cloud File Storage |
| 11. | Machine Learning Model | Automated decision making for loan giving details for decision. | n approval and | CNN, DNN |
| 12. | Infrastructure (Server / Cloud) | Default | | Flask |

Table-2: Application Characteristics:

| S.No | Characteristics | Description | Technology |
|------|--------------------------|--|--------------------------------------|
| 1. | Open-Source Frameworks | Flask is used to host the website. Scikit, numpy and tensorflow are all open source python machine learning frameworks. | Scikit, Numpy, Tensorflow, Flask |
| 2. | Security Implementations | OpenSSL is a program and library that supports many different cryptographic operations, including: Symmetric key encryption. Public/private key pair generation. Public key encryption. Hash functions. | OpenSSL Encryption |
| 3. | Scalable Architecture | Since the application servers can be deployed on many machines. Also, the database does not make longer connections with every client – it only requires connections from a smaller number of application servers. It improves data integrity. | 3 Tier Architecture |
| 4. | Availability | Decentralized storage and distribution along-with web application approach make the service highly available. | IBM Cloud file storage, MySQL Online |
| 5. | Performance | Long term header expiration. | AJAX, CDN |

| S.No | Characteristics | Description | Technology |
|------|-----------------|--|------------|
| | | Cacheable AJAX Cookie Free Domain Compress gzip components | |
